Chapter 14 The Human Genome Making Karyotypes Lab Answer

A karyotype is a photograph of all of an organism's chromosomes. The chromosomes in the karyotype are arranged in homologous pairs according to size (largest to smallest). Homologous pairs can be determined by centromere placement, equal length of top and bottom arms as well as similar band placement on each arm.

Bing: Karyotype Lab Answer Key

Select all choices that describe ways that chromosomes are sorted to form the characteristic organization of a karyotype. The analysis involves comparing chromosomes for their length, the placement of centromeres (areas where the two chromatids are joined), and the location and sizes of G-bands
