Physics 12 - Chapter 11 Quiz - Nelson

Sample answer: An object that has a lot of inertia has a much stronger resistance to changes in motion. If it is at rest, then it will require more force to start moving it. If it is in motion, then it will require more force to change that motion. Similarly, an object with less inertia has less resistance to changes in motion. 21. Answers may vary.

First find the amount of power lost due to transmission in watts, using the power equation in the form $P = I^2R$: $P = I^2R = (6.0 \text{ kA})^2(0.50 \text{ !}) = (6.0!103\text{A})^2(0.50 \text{ !}) = 1.8!107\text{W}$ $P = 18 \text{ MW}$. So the power lost due to transmission is 18 MW.
