Relaxing lending controls will boost aggregate demand and shift the curve to the right. e) Yes, you have chosen the correct option. This is a supply-side policy and so will shift the aggregate supply curve. e) No, you have not chosen the correct option. This is a supply-side policy and so will shift the aggregate supply curve.

Economics: Supply - ProProfs Quiz

A sudden surprise event that increases or decreases output temporarily. When output is increased (decreased), the price of the good decreases (increases) due to a shift in the supply curve to the right (left). The above diagram demonstrates an increase in price due to a decrease in the supply of a good relative to demand.
